

FLUSH & SEMI-FLUSH MOUNT

Fluid Square Ceiling

DESCRIPTION

The Fluid is created by pouring molten glass into a contoured mold, letting it cool, and then fire-polishing it to a glossy finish. It gives the impression of flowing water frozen in time. The unique and elegant look of the piece changes at every angle based on how light hits the surface of the glass. May be mounted on the ceiling or wall. Available in three lamp configurations: incandescent, fluorescent, and LED. Large incandescent includes two 120 volt, 40 watt G9 base halogen lamps; Small incandescent includes one 120 volt 40 watt G9 base halogen lamp; Large fluorescent includes two 13 watt 2GX7 base twin tube lamps and electronic ballast; Large LED includes one 23 watt, 1192 net lumen, LED module; Small LED includes one 12 watt, 472 net lumen LED module. Incandescent version dimmable with a standard incandescent dimmer (not included). LED version dimmable with low-voltage electronic dimmer (not included). Suitable for wet locations. ADA compliant.

INSTALLATION

This product can mount to either a 4" square electrical box with round plaster ring or an octagonal electrical box (not included).
