

**GENERAL PRODUCT INFORMATION:**

These fixtures are intended to be installed utilizing NEC compliant junction boxes.

This product is suitable for damp locations.

This product may be dimmed with a low-voltage electronic dimmer.

This instruction shows a typical installation.

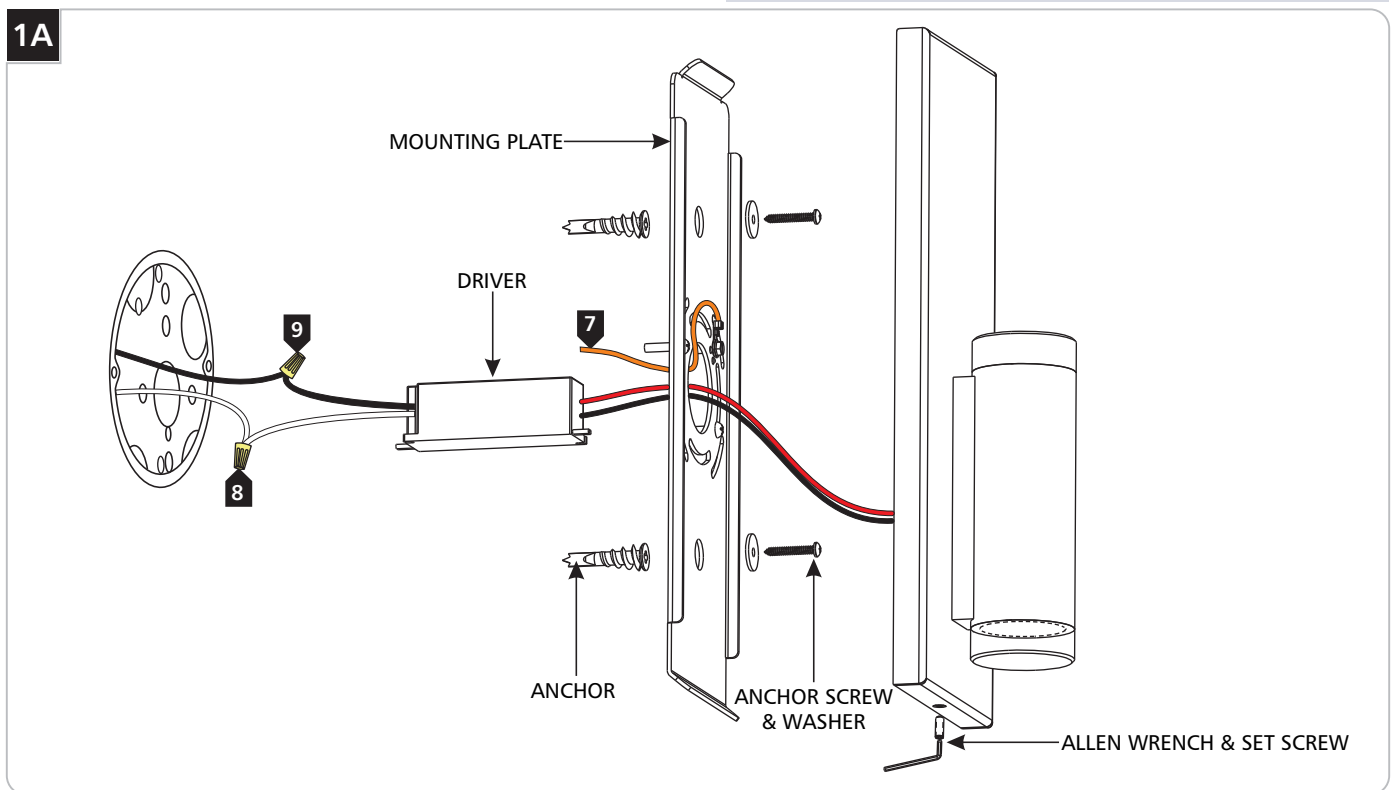

**CAUTION - RISK OF FIRE**

This product must be installed in accordance with the applicable installation code by a person familiar with the construction and operation of the product and the hazards involved.

Use minimum 90°C supply conductors.

**Install the Fixture**

- 1 With the provided Allen wrench, loosen (**do not remove**) the set screw on the bottom of the fixture base.
- 2 Remove the mounting plate from the fixture base
- 3 Install the mounting plate to the junction box with the two #8-32 screws provided.
- 4 Verify that the mounting plate is level before continuing. Line up an anchor tip with the center of an anchor hole, and push the anchor into the wall up to the threads.
- 5 Screw the anchor in the rest of the way with a Phillips-head screwdriver. Repeat for the other anchor hole.
- 6 Slide an anchor screw through a washer, and screw it into an anchor to secure the fixture base to the wall.
- 7 Connect the fixture to a suitable ground in accordance with local electrical codes.
- 8 Connect the white driver wire to the neutral power line.
- 9 Connect the black driver wire to the hot power line.
- 10 Properly place the driver, all wires, and wire nut connections into the electrical box, and attach the mounting plate to the junction box using the two provided #8-32 screws.
- 11 Mount the fixture back onto the mounting plate and reinstall the set screw (reversal of step 1A).
