Installing the Lamp

CAUTION: To reduce the risk of a burn or electric shock during relamping, disconnect the power to the fixture.

NOTE: Use only your fingers and a soft cloth to replace the lamp.

Use **MAX 75 Watt, MR16 Front Cover Halogen Lamp.**

- 1 Push the MR16 lamp pins all the way into the socket pins.

Installing Jane by Using Spring Clips

NOTE: Use this installation only when bare (uninsulated) Kable Lite cables are used.

- 1 Unsnap the spring clip from the fixture arms.

- 1 Wrap the spring clip around the Kable Lite cable.
- 2 Snap the tip of the hook onto the fixture arm.
- 3 Repeat steps 2 and 3 for the other arm.

Installing Jane by Using Fixture Connectors

NOTE: Use this installation for both bare and insulated Kable Lite cables.

- 1 Remove the spring clips.
- 2 loosen (Do Not Remove) the #4-40 set screw on the fixture connector with the 0.05 Allen wrench.
- 3 Feed the fixture wire into the fixture connector.

- 4 Tighten the #4-40 setscrew with the 0.05 Allen wrench.

- 5 Loosen and remove the piercing screws from tip of the fixture connectors.
- 6 From bottom of the Kable Lite cables, feed one fixture connector onto each Kable Lite cable.
- 7 Replace and tighten the piercing screw on the fixture connectors.

IMPORTANT SAFETY INSTRUCTIONS

To reduce the risk of fire, electrical shock, exposure to excessive UV radiation, or injury to person:

- Use this fixture indoors only.
- Do not look directly at the lighted lamp.
- Do not remain in light if skin feels warm.
- Risk of fire: Use only the type of lamp and maximum wattage indicated in this instruction manual.
- Never cover the halogen lamp with anything other than a Tech Lighting lamp shield and never place flammable material close to your fixture.
- Never turn the fixture on and off by connecting and disconnecting the halogen lamp.
- Do not touch the fixture shades or lamp shield while the fixture is on. These surfaces may be HOT.

Halogen Lamp General Information

- A new halogen lamp may smoke slightly when it is used for the first time. This is perfectly normal; the protective coating is simply being vaporized.

Two Tips For Prolonging Halogen Lamp Life

- First avoid touching the lamp with bare hands during installation. Any contaminant, even the oil from your hands can deteriorate the lamp. Rubbing alcohol can be used to remove any contaminant.
- Second, do not run the lamps at full power when you do not need to. However, if dimming the fixture for an extended period of time, occasionally bring the light up to full brightness for a few minutes to complete the halogen cycle.
